

My Name is Ryan. I am 13 and I go to middle school in Orange County, CA. I had 3 open-heart surgeries and an angioplasty before I was 2 years old and in 6th grade I got a stent in my aorta. I was born with hypoplastic right ventricle, transposition of the grand arteries, coarctation of the aorta, ventricular septal defect and tricuspid atresia. Today I enjoy activities such as skiing, skateboarding, skim boarding, acting, drumming, golf and tennis.
